

## Nuwellis, Inc. Reports Third Quarter 2022 Financial Results

November 8, 2022

MINNEAPOLIS, Nov. 08, 2022 (GLOBE NEWSWIRE) -- Nuwellis, Inc. (Nasdaq: NUWE), a medical technology company focused on transforming the lives of people with fluid overload, today reported financial results for the third quarter ended September 30, 2022.

### Q3 Results and Recent Highlights:

- Revenue of \$2.1 million in the third quarter 2022, an 11% increase over the same year ago period
- Gross margin of 61% was consistent with the same period last year
- Activated three additional sites for pivotal REVERSE-HF clinical study
- Announced AVOID-HF clinical study analysis demonstrating statistically superior benefit of ultrafiltration over diuretics for fluid-overloaded heart failure patients at 30 and 90 days
- Announced clinical data demonstrating reduced mortality rates, with 100% survival rate in post-operative CABG patients at 30 days following use of ultrafiltration
- Awarded U.S. patent for novel innovation that improves fluid balance and safety in pediatric dialysis and hemofiltration
- Closed an underwritten public offering on October 18, with \$11.0 million of gross proceeds

"We made meaningful progress this quarter on the continued execution of our key strategic initiatives and achieved 11% year-over-year revenue growth. These results not only demonstrate that we are gaining traction on the sales front but also continuing to achieve key milestones toward making the Aquadex system the standard of care for restoring fluid balance. We are confident that continued expansion of our field sales team, including clinical education specialists, bolstered by our market penetration initiatives and growing body of clinical evidence, will position Nuwellis well for strong growth in 2023 and beyond," said Nestor Jaramillo, CEO of Nuwellis.

### Third Quarter 2022 Financial Results

Total revenue for the third quarter of 2022 was \$2.1 million, an increase of 11% compared to the third quarter of 2021.

Gross margin was 61.0% for the third quarter of 2022 compared to 60.4% in the prior-year period.

Selling, general and administrative expenses for the third quarter of 2022 were \$4.3 million, compared to \$4.6 million in the prior-year period. This reduction resulted from continued spending vigilance, as well as some open positions in the current year quarter.

Third quarter research and development expenses were \$0.9 million, compared to \$1.7 million in the third quarter of 2021, while continuing to advance the most critical new product development initiatives.

The net loss for the third quarter of 2022 was \$3.9 million, or a loss of \$0.37 per basic and diluted common share, compared to a net loss of \$5.3 million, or a loss of \$0.75 per basic and diluted common share in the prior-year period.

Cash and cash equivalents were approximately \$12.1 million at September 30, 2022. On October 18, Nuwellis closed an underwritten public offering with gross proceeds of \$11.0 million. After deducting underwriting discounts and commissions on the offering, pro forma cash at the end of the third quarter would have been \$21.9 million.

### About Nuwellis

Nuwellis, Inc. (Nasdaq: NUWE) is a medical technology company dedicated to transforming the lives of patients suffering from fluid overload through science, collaboration, and innovation. The Company is focused on developing, manufacturing and commercializing the Aquadex SmartFlow® system for ultrafiltration therapy. Nuwellis is headquartered in Minneapolis, MN, with a wholly owned subsidiary in Ireland.

### About the Aquadex SmartFlow System

The Aquadex SmartFlow system delivers clinically superior therapy using a simple, flexible and smart method of removing excess fluid from patients suffering from hypervolemia (fluid overload). The Aquadex SmartFlow system is indicated for temporary (up to 8 hours) or extended (longer than 8 hours in patients who require hospitalization) use in adult and pediatric patients weighing 20 kg or more whose fluid overload is unresponsive to medical management, including diuretics. All treatments must be administered by a healthcare provider, in an outpatient or inpatient clinical setting, under physician prescription, both having received training in extracorporeal therapies.
